This new tool will enable those who need to quickly verify terminal charges; such as, full container storage, reefer monitoring, hazmat storage and others. Also, we are up and running with our new payment system thru the web link: <http://tpsm.Intership.Ws>. This site may be used to make payments for the various terminal charges mentioned above and we are convinced that it will speed up the process for all of those who have been making these payments at our terminal, especially the truckers who most of the time perform these services for their customers and various other entities.

We request that you advise your customers of these new services as we are certain that they will be open and quite willing to utilize them. So far, we have received excellent feedback from customers and truckers who have used the web system. We invite you to assist us in promoting these excellent tools which will greatly benefit you, our customer and your clients.
